

Monthly Report — Acme Health

Monthly Report — Acme Health

Executive Summary

Acme Health sustained solid organic performance over the last 30 days, delivering 12,480 clicks from search and generating 45.2 K sessions overall. Core content pieces—Protein Guide, Collagen Facts, and Omega 3 Guide—continue to drive the majority of traffic and engagement, with protein-related queries showing the strongest click-through and position metrics. AI-driven visibility remains modest (score 34/100) and lags behind key competitors Healthline (71) and Examine (58). While keyword rankings have improved (e.g., “best protein for women” moved from 11 to 8), overall AI citation counts and visibility share indicate growth opportunities.

KPI Performance Overview

- Total Clicks (GSC): 12,480
- Total Impressions (GSC): 318,400
- Average CTR (GSC): 3.92 %
- Average Position (GSC): 13.4
- Total Sessions (GA4): 45,200
- Active Users (GA4): 38,100
- Engaged Sessions (GA4): 29,400
- Engagement Rate (GA4): 65.04 %
- Conversions (GA4): 890
- AI Visibility Score (Semrush AI): 34 / 100
- AI Mentions: 128
- AI Citations: 86
- Monthly AI Audience Reach: 418 K

Traffic & Visibility Trends

- Search Clicks & Impressions remain steady (12.5 K clicks, 318 K impressions) with a modest CTR of 3.9 % and average SERP position of 13.4.
- Organic Sessions (18,640) account for ~41 % of total sessions, confirming search as the primary acquisition channel.
- AI Visibility shows a modest upward trend in mentions (128) but remains behind competitors (Healthline 420, Examine 285).
- Top Queries – “best protein for women” (1,250 clicks, 7.6 % CTR, position 6.2) leads, followed by “vegan collagen myths” and “omega 3 benefits.”

Best Performing Content

| Page (URL) | Sessions | Users | Bounce Rate | Avg. Session Duration |

|-----|-----|-----|-----|-----|

/blog/protein-guide	4,820	4,100	38.2 %	2 m 22 s
/blog/collagen-facts	2,910	2,540	41.5 %	1 m 58 s
/guides/omega-3	2,240	1,980	44.8 %	1 m 36 s

All three pages also rank highest in GSC clicks (1,750; 1,040; 820) and have strong CTRs (6.97 %, 7.54 %, 4.27 %).

Query & Keyword Insights

Top Search Queries (GSC)

| Query | Clicks | Impr. | CTR | Avg. Position |

|-----|-----|-----|-----|-----|

best protein for women	1,250	16,400	7.62 %	6.2
vegan collagen myths	880	12,650	6.95 %	7.9
omega 3 benefits	740	19,800	3.74 %	10.1

Keyword Rankings (Semrush)

| Keyword | Position | Search Vol. | Traffic % | CPC | URL |

|-----|-----|-----|-----|-----|

best protein for women	8 (+3)	12,100	4.2 %	\$1.85	/blog/protein█guide
vegan collagen myths	11 (+3)	5,400	2.1 %	\$1.42	/blog/collagen█facts
omega 3 benefits	14 (+2)	33,100	1.8 %	\$0.98	/guides/omega█3

Improvements noted for all three core keywords relative to the prior period.

Competitor Insights

- Healthline dominates AI visibility (score 71) and holds top SERP spots for “best protein for women” (pos 3) and “vegan collagen myths” (pos 5). Their authority score is 91 with 98.4 K referring domains.
- Examine leads AI visibility among secondary competitors (score 58) and ranks #4 for “omega 3 benefits.” Authority score 78, 18.4 K referring domains.

| Metric | Acme Health | Healthline | Examine |

|-----|-----|-----|-----|

| AI Visibility Score | 34 | 71 | 58 |
| Authority Score (Semrush) | 45 | 91 | 78 |

Referring Domains	890	98,400	18,400
Top Keyword Traffic Share (protein)	4.2 %	18.4 %	6.8 %
Top Keyword Traffic Share (collagen)	2.1 %	9.2 %	11.2 %
Top Keyword Traffic Share (omega-3)	1.8 %	–	14.6 %

Acme trails in both authority and AI visibility, with competitors capturing a larger share of high-intent traffic.

GEO / AI Search Visibility

- AI Visibility Score: 34 (vs. Healthline 71, Examine 58)
- Platform Distribution: chatGPT 41.2 % share (52 mentions), Google AI Overview 32.8 % (44 mentions), Gemini 26.0 % (32 mentions).
- Citation Hotspots:
 - protein guide – 38 citations, avg. position 2.1, cited in 24 prompts (chatGPT, Google AI).
 - collagen facts – 22 citations, avg. position 3.4, 14 prompts (Gemini, chatGPT).
 - omega-3 guide – 12 citations, avg. position 4.8, 9 prompts (Google AI).

The concentration of citations on the Protein Guide indicates stronger AI recognition for that asset, while Omega-3 remains under-cited.

Engagement & Conversion Insights

Metric	Value
Total Sessions	45,200
Active Users	38,100
Engaged Sessions	29,400
Engagement Rate	65.04 %
Conversions (overall)	890
Organic Search Sessions	18,640
Organic Search Users	15,820

Landing-page level conversion data is not broken out, but the high engagement rate (65 %) suggests that the top content is resonating with the audience.

Learnings & Strategic Recommendations

- Leverage high-performing protein content – it drives the most clicks, AI citations, and visibility. Expand the topic cluster (e.g., “protein for women over 40”) to capture additional long-tail queries.

- Close the AI visibility gap – prioritize structured data and schema enhancements on all top pages to boost AI citation frequency, especially for the Omega-3 guide.
- Target competitor weak spots – Healthline dominates protein and collagen SERPs; Acme should focus on niche sub-topics (e.g., “plant-based collagen alternatives”) where competitor content is thin.
- Boost backlink authority – current Authority Score (45) lags considerably. Pursue high-quality guest posts and partnerships in health/fitness domains to increase referring domains.
- Optimize underperforming keywords – “omega 3 benefits” sits at position 14 with low CTR. Refresh on-page content, add FAQ schema, and test new internal linking from the high-authority Protein Guide.

Next Month Priorities

Priority	Action	Owner	Target Completion
AI Citation Growth	Add structured FAQ and schema to Omega-3 guide; request AI citation through content partnerships	SEO Lead	End of Month 1
Authority Building	Secure 5 guest posts on high-DA health sites; acquire 200 new referring domains	Link-Building Specialist	End of Month 2
Keyword Expansion	Create cluster content around “protein for women over 40” and “vegan collagen benefits”	Content Team	End of Month 1
Conversion Tracking	Implement GA4 event tracking on CTAs in top landing pages to attribute conversions per page	Analytics Engineer	End of Month 1
Competitive SERP Targeting	Optimize Collagen Facts page for SERP position 2–3 (targeting healthline gap)	SEO Team	End of Month 2
